PRODUCT DATA SHEET

TD Series

THRU-CARRIER METALLIC COLD DIELESS FOIL

TYPICAL PRODUCT APPLICATIONS:

Self adhesive labels	Folding cartons	Tickets	Shrink Film
Flexible packaging materials	Tags	Forms	

CARRIER:

12 micron polyester STD silver / gold
15 micron polyester diffraction foils.

FEATURES & BENEFITS TO CUSTOMERS:

Formulation is compatible with a wide range of UV adhesives used in the cold foiling process resulting in good high speed transfer.

Foil areas are bright and defect free when used with suitable adhesive and machine set-up. Preparatory cost is minimal.

COVERAGE:

Very fine detail to large area, also allows for halftones in metallic or holographic finishes.

RECOMMENDED SUBSTRATES

Filmic label stock	
Coated paper and card	Inked and varnished paper and card

RELEASE CHARACTERISTICS

Easy allowing machine speeds up to 150m/min (490ft/min).
