

Lamination Film

Base material:	Suitable for laminating onto a broad range of substrates such as paper, card or polymer-based materials.
Overprinting:	Chemically treated for print-compatibility with offset, flexo, gravure, letterpress or screen technologies and receptive to embossing and foil blocking.
Lamination machines:	Suitable for processing on all major types of lamination machinery, using wet applied and extruded adhesive on both sheet-fed and reel-fed equipment.
Format:	Roll widths from 50mm up to 1220mm (800mm for shim free patterns).
Minimum order quantities:	Down to 3,660 sq metres (610mm x 6,000m) but depends on the design. Further details available on request.

Data contained in this information sheet is provided as a source of information that we believe to be accurate and reliable but does not constitute a warranty of any kind. Customers should determine to their own satisfaction the suitability of this material for a specific purpose. API reserves the right to change specifications without notice. Please contact the Market Support Team at API Foils for further Technical Information about this product and contact the Customer Service Team for availability details.
